

Blueberry Egg Dye

2 C water

2 C blueberries (can use thawed)

1. In a medium saucepan bring mix to a boil then cover and simmer for 10 min.
2. Drain thru a metal sieve to filter out the liquid.
3. Add 1 teaspoon white vinegar.
4. Dye eggs as usual.

Leave them in 10 min plus, it doesn't seem to matter the length of time, they pretty much turn out the same color.
